Release Features

nS QuickPrint Panel with Preview

Now the panel comes with visualizations of your print documents that will be sent and printed in neoStampa's Print Server. Within the connection to printers Print Server's, you will get the layouts synchronized to your computer and stored in the folder named as your printer.

Your browser does not support the HTML5 video element

nT Masquerade background generation

Now separations can be generated in the background of the plug-in.

Download profiles from neoCatalog

When working with neoCatalog and assigning a printer profile to the color library and colroways in neoCatalog, then the profile information will be synchronized to nT Colorations.

Your browser does not support the HTML5 video element

nC neoCatalog Panel using cloud download

If you work with [neoCatalog Cloud Service download](#) (v3.9.0), then in nC Catalog Panel you can enable or disable the option.
